Charm++ - Feature #1612
Support for using rdma to return data from a [sync] entry method
06/16/2017 03:45 AM - Sam White

Description
I haven't thought this all the way through, but I think there could be ways to support returning data from [sync] entry methods using rdma sends, such that the sync method doesn't have to allocate a message or have PUP called on the value it is returning. This would be useful for AMPI's MPI_Get and such implementations.
